

Six

The Premium
Choice

for affordable shared services

Maximising user comfort and diagnostic confidence

Designed with exclusive ergonomics and ultrasound imaging features, MyLab™Six is the Premium Choice in its class.

Discover the system's performance and usability which is perfectly tailored for your daily clinical needs.

19-inch widescreen LCD

A powerful ultrasound engineering or an ergonomic probe design can certainly improve your work, but few things help you feel more productive. MyLab™Six offers an unconventional 19-inch widescreen LCD, where clinical images and data are flawlessly displayed to increase users' comfort and to reduce eyestrain.

Touchscreen technology

This system's touchscreen design delivers advantages such as greater speed, superior responsiveness and easy interface usage. MyLab™Six provides a large and high resolution touch panel that promptly displays functions and commands precisely when you need them.

Easy workflow

Improving workflow is an important process both for a dedicated use and for an interdisciplinary organization. An improved workflow maximizes efficiency while minimizing wasted time and resources. MyLab™Six has been designed to supply a smooth workflow and full operator comfort from probe's features to cart's details.

From application specific to fully shared services

General Imaging and Women's Health

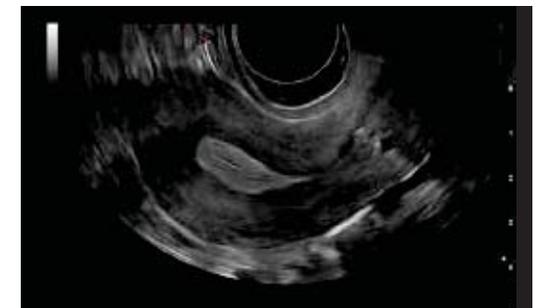

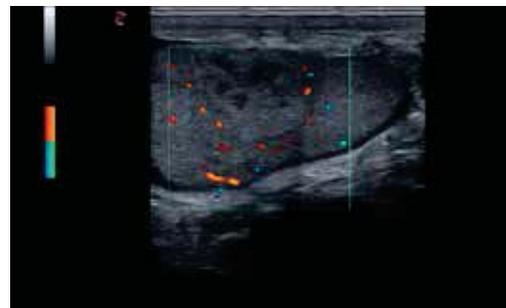

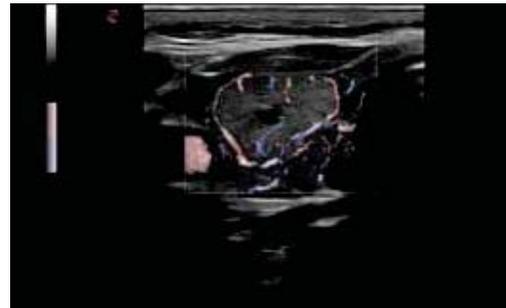

MyLab™Six integrates the latest Imaging Technologies such as Tissue Enhancement Imaging (TEI) and XView algorithm processing to provide you with exceptional high-resolution and artefact-free images.

An additional powerful technique, the MView (optional), allows to further enhance details to display enhanced borders and interface structures.

An ultra sensitive Colour & Power Doppler with Spectral waveform analysis is available to support vascular investigations. It also includes special advanced technologies such as X-Flow, to detect very low flows.

From abdomen, small parts and breast imaging to musculoskeletal, obstetrics and gynecologic applications, MyLab™Six offers a large choice of transducers (Bi- and Tri- Dimensional) to cover any kind of ultrasound investigation for General Imaging and Women's Healthcare.

The system provides DICOM connectivity (optional) and MyLab™Desk³ comprehensive software suite for off-line post-processing and reporting.

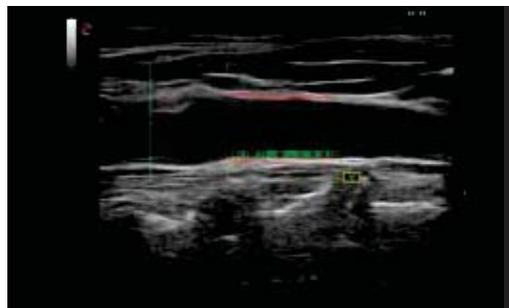

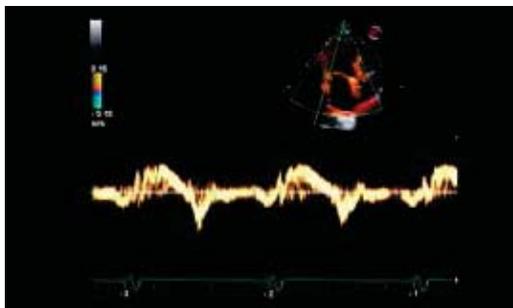

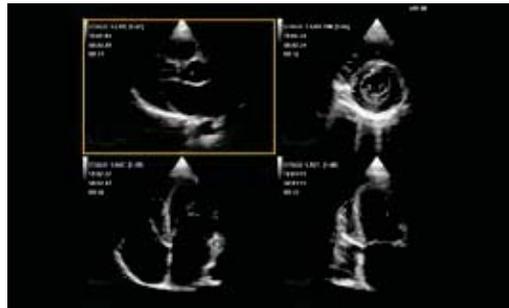

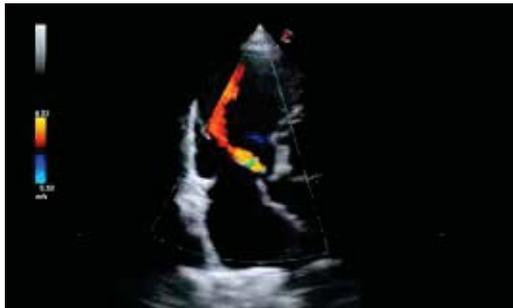

Cardiology and Vascular

MyLabTMSix delivers an extraordinary cardiovascular ultrasound package, starting from fundamental 2D-M mode imaging (with TEI and XView Technologies) to top performing CFM, PW and CW Doppler, that properly manage any kind of required examination.

The measurements configurator allows users to add any new measurements to the default packages by defining their label, formulas and final report display. The innovative Compass M-Mode option allows up to multiple M-Mode lines, as well as TVM (Tissue Velocity Mapping) while the Stress Echo package provides a complete wall motion analysis for myocardial function evaluation.

As exclusive features for a system of this class which truly sets MyLabTMSix apart from all other systems is its capability to employ QIMT and XStrain* (2D & 4D) advanced technologies, in addition to the optionally available transesophageal multi-plane transducer.

* through MyLabTMDesk³ software suite

High on vision, Low on noise

Stay focused on your exam without being distracted by the sound of your ultrasound system.

MyLab™Six is appreciated as an extreme silent scanner for utmost user comfort during the examination.

It leaves sonographers free to fully concentrate on patient and diagnosis.

Ultra-low-power consumption

Experience a resilient system which makes careful use of resources by requiring less energy.

The core of MyLab™Six is green, providing a proficient long-lasting system for shared service applications which results in more efficient healthcare.

Product

LESS Energy Required
MORE Efficient Healthcare

appleprobe

Esaote's appleprobe

The innovative approach in ergonomics keeps hands and wrists in their natural alignment by distributing grip throughout the entire hand as when one grips an apple. You can relieve finger and the wrist tension when not scanning, by simply keeping the probe between your fingers.

Touchscreen technology

@Touch

@Touch

Customized settings and multiple functions can be organized according to clinical preferences and then easily recalled by just pressing a button.

Articulated arm

Integrated BW printer

Wireless connectivity

Being equipped with wireless connectivity, easy networking is just a click away.

Cable organizer

Storage Shelf

Remote service

Your system will be recovered in the shortest time possible. Simply connect it to the network and Esaote's Service Team will easily troubleshoot any issues, perform proactive maintenance and monitor performance.
