

Imaging at your fingertips

MyLabTouch™

Imaging at your fingertips

Today's medical needs require optimal solutions, where performance meets mobility and ease of use. MyLab™Touch is the latest option which satisfies this growing demand, with the highest level of versatility and flexibility. In very compact dimensions, the most important technologies have been integrated for reliable and fast diagnosis. Large touch-screen with wide image dimensions, simple and intuitive user interface and the light and ergonomic appleprobe transducers are crucial aspects of the product profile.
